CROSSLINK® BAND CEMENT PATIENT CAPLETS

ONLY FROM
TP ORTHODONTICS

CROSSLINK® BAND CEMENT

TPO is the first to offer light cure band cement packaged in single-patient caplets.

Time Saving

CrossLink band cement helps reduce chair time. This light-activated, glass ionomer hybrid cement requires no mixing and no measuring. CrossLink band cement cures in 30 quick seconds, and requires no conditioners or sealants.

CrossLink also contains fluoride to control decalcification under the bands during treatment.

Convenient

CrossLink band cement is pure convenience. The caplets eliminate excessive waste and cross contamination between patients.

After each patient, the caplet is thrown away.

With single-patient CrossLink caplets, simply cut the tip and squeeze. The narrow-tipped design accurately dispenses adhesive directly into the molar bands.

The flow of cement can be customized by cutting the tip shorter to produce a larger-diameter opening.

Two Caplet Sizes

CrossLink caplets are designed for dispensing cement into a single patient's band or bands. Small CrossLink caplets are designed to fill a single molar band, while the large size contains cement sufficient for four bands.

Large CrossLink caplet -
1.8g each

Small CrossLink caplet -
.4g each

Two Color Choices

CrossLink band cement is available in two colors. Natural cement blends with enamel, while blue cement helps expedite clean-up after band placement.

Natural-colored cement

Blue-colored cement

At TP Orthodontics we never stop looking for a better way to do things. Orthodontists around the world choose TPO brands because they provide innovative orthodontic solutions that no other manufacturer can match.

Our engineers understand the difference between technology that works in a lab and what really works in your practice. This means not a single product is released into the market until we know it will perform to your highest expectations.

We believe in developing products that make your treatment more effective and your patients happier. Our dedicated customer service personnel are standing by to assist you. When you choose TPO as your orthodontic partner, you get only the best for your practice.
