

# Tip-Edge® PLUS

Smart Braces  
for Beautiful Results

Model shown wearing Tip-Edge PLUS aesthetic braces

# Tip-Edge® PLUS

## Why Tip-Edge?

Tip-Edge PLUS braces are designed to move teeth gently. By allowing your teeth to move or “tip” naturally, your treatment is more comfortable than with regular braces. Thanks to Tip-Edge technology, your orthodontist may even be able to **complete your treatment sooner.**

### Stainless Steel Braces

Many patients prefer metal braces and opt to style them with different colored ligatures at each appointment. **Metal Tip-Edge PLUS braces are great for patients of all ages!** As with all Tip-Edge braces, they are very small with smooth edges, so cheeks and lips don't get irritated.

Great results.  
Fewer  
appointments.

## Aesthetic Braces

Tip-Edge PLUS aesthetic braces have the same great performance features in a beautiful, aesthetic design.

What really sets Tip-Edge PLUS aesthetic braces apart is **Personalized Color-Matching Technology<sup>®</sup>**:

- **Personalized Color-Matching Technology** allows your braces to match your own unique tooth shade. Braces blend in so only your natural smile shows through!
- When used with tooth-colored wires and clear ligatures, they **won't even be noticeable** in photos.
- You can also **add personal style to your aesthetic braces** by selecting colored ligatures at your appointments. Have fun and design a smile as unique as you.

**Tip-Edge PLUS aesthetic braces match virtually any tooth color.**

# Delivering a straight, beautiful smile in fewer appointments than with regular braces.
