CrossLink[®]

Light Cure Band Cement

CrossLink light cure band cement is available in no-mix, no-mess, single-use dispensing caplets. Disposable squeeze caplet has an angled, tapered stem for excellent control when dispensing paste. Simply cut the caplet tip and dispense cement into bands. For faster dispensing, the tip can be cut shorter to produce a larger diameter opening.

Fluoride ion releasing paste does not require sealant, and there is no rush to beat setting time. Complete cure is accomplished in 30 seconds. CrossLink provides excellent band retention.

CrossLink is available in a natural or blue color. Blue helps clinicians to see cement when cleaning excess flash after cementing bands.
