

ENAMEL PROTECTION. SMILE PERFECTION.

“The polymer base protects the tooth enamel from the ceramic, and separates nicely when debonded.”

– Bart Wilson, DMD, San Antonio, TX

Patient Satisfaction and **Your** Practice

Patients love the look of TPO® Aesthetic Brackets that feature *Personalized Color-Matching Technology*®. Doctors appreciate the way they perform—debonding is safe and comfortable due to the enamel protection interface between the bracket and enamel.¹ Try InVu® Aesthetic Brackets in your practice today and see the difference, not the brackets.

1. Clinical performance of uncoated and precoated polymer mesh base ceramic brackets; Hüdanur Yilmaz (née Huda Abulkbash) and Selma Elekdag-Türk; *Progress in Orthodontics* (2019) 20:4.

Achieving Results with InVu® Aesthetic Brackets

InVu®

A conversation with Bart Wilson, DMD,
board-certified orthodontist and Diplomate
of the American Board of Orthodontics
based in San Antonio, Texas

When did you first discover InVu Aesthetic Brackets?

During my residency. I had a chance to visit TPO in person. Seeing the workmanship that goes into each product made me want to work with this orthodontist-centric, family-owned company. I've been using InVu since the day I began my practice.

Give us your top three reasons for choosing InVu.

- For me, color-matching is number one. *Personalized Color-Matching Technology*® allows InVu to blend unbelievably well with natural tooth enamel of any shade.
- The brackets are easy to place and hold up well during treatment—they're easy to position and work with, and I get the desired torque and control I expect. More importantly, the proprietary polymer base preserves tooth enamel during debonding, making bracket removal a consistently safe process.
- TPO customer service is impeccable, and the product speaks for itself.

What do your patients have to say about InVu?

We work hard to inform and guide our patients toward the ideal treatment modality. InVu Aesthetic Brackets offer something clear aligners cannot: predictable, routine results with minimal help from patients.

When aligner compliance is lacking with a patient, there's only one true alternative: InVu. We get transfer patients from clear aligner doctors and they all say the same thing, "I need results." We assure them InVu achieves results efficiently and effectively.

Plus, InVu Brackets are barely noticeable in person or in pictures. As the finishing doctor, we've watched these patients become raving fans, which leads to new referrals.

Dr. Wilson attended dental school at the Medical College of Georgia in Augusta. He then honed his skills in its Orthodontic Residency program. Today, he and the staff at Mission Orthodontics are dedicated to helping patients craft the smile of their dreams.

Dr. Wilson is not a consultant of TP Orthodontics, Inc. and receives no monetary compensation for his opinions of the product presented.
