GATE OPENING TOOL

100-184 Gate Opening Tool

Recommended jig heights: Maxillary central 4mm, lateral 3.5mm, cuspid 4.5mm, bicuspid 4mm. Mandibular anterior 3.5mm, cuspid 4mm, bicuspid 4mm.

Package of 10

Non-Extraction

NON-EXTRACTION

Positioning Jigs

RECOMMENDED JIG HEIGHT

Incisal jigs are designed to help with accurate incisogingival bracket placement and assist with sighting long axis crown angulations.

Jig measurements are from the center of the archwire slot to the incisal edge or cusp tips.

Color coding identifies the various heights.
