CONFIDENCE
YOU CAN SEE,
BRACES
YOU CAN'T

Braces that match your smile

Why InVu?

Imagine wearing braces that blend with the shade of your teeth so well that people might not even notice you're wearing them.

InVu aesthetic braces feature Personalized Color-Matching Technology® that allows them to match virtually any tooth shade by blending in with the surrounding enamel.

There's no need to hide your braces! An investment in a healthy smile is always in style – you can even have fun by adding different color ligatures to your braces at each dental appointment.

After you've made the decision to improve your smile, there is important information to consider when choosing the treatment method that works best for you. If you are considering aligners or “clear” braces, you may find the following comparison helpful.*

InVu®
Aesthetic
Braces

What's the difference between orthodontic treatment with InVu braces versus aligners?

InVu Braces

- New technology has resulted in “clear” braces that are **barely noticeable** and aren't obvious in photos!
- **Always active**, they constantly and gently move your teeth toward the desired position
- No need to worry about taking them in and out throughout the day since they are **bonded directly** to your teeth
- Treatment with bonded braces is more predictable – and may treat **complex cases in less time** than aligners
- Braces are more effective in improving your occlusion and **create a healthy “bite”** as a matter of the course of treatment

Aligners

- Are barely noticeable and can be removed for special occasions or photos will require quite a bit of “maintenance” on your part
- Work intermittently – the force on your teeth is strongest at the beginning of each tray change, which can be uncomfortable
- Can be removed (and must be removed even to snack or drink anything but water), but typically must be worn 22-23 hours per day or more
- You may still have attachments bonded directly to your teeth – and may even need to use elastics as you would with braces
- Aligners have limitations with correcting your occlusion or “bite”^{2,3} and depending on your case or tooth movement you may require an additional set of trays or other treatment

*Only your doctor can recommend the best treatment plan for your particular case and desired outcome. This information is provided for you to make an informed decision regarding the potential day-to-day experience with the treatment methods presented. It is not intended to be medical advice.

Giving tooth enamel the protection it deserves

InVu cosmetic braces provide the ultimate combination of beauty and performance, resulting in a healthy bite and a smile you can be proud of.

The InVu difference:

- Designed to **protect your tooth enamel**, and for ease of removal at the end of treatment and **maximum comfort** due to small size and ultra-smooth surface and robust ceramic material reduces the risk of breakage, assuring your treatment stays right on track
- Exclusive Personalized Color-Matching Technology allows the braces to blend in with your natural tooth color
- Aesthetic tooth-colored wires are available to perfectly complement your new braces
- For bleached and natural tooth shades
